Modular Clean Rooms

Turnkey Facility Solutions
From Conceptual Designs to Commissioning & Validation.

pharmaaccess
Engineering a Healthier Life

Pharma access has solutions for clean room applications. Our systems are successfully proven in locations where clean and constant conditions are required, clean room technology covers the entire range of product and services within the field of clean room technology. Our main strengths within the field lie in the clean room appropriate design and implementation of concepts, harmonious collaboration with regard to performance and hand in hand co-operation with regard to performance and hand in hand co-operation with regard to installation and commissioning of the systems. This is rounded off by the performance of professional qualification services, a comprehensive range of after sales service and training.

Know-how in numerous fields of clean room application

- Pharmaceutical
- API
- Active agent production
- Genetic and Biological engineering
- Laboratories
- Pharmacies
- Medical devices
- Foodstuff industry
- Soft Drink / Beverage industry

And for all other fields of application, in which a conditioned or controlled and ultra clean environment is required for critical technologies.

Total protection of persons, products and processes

Clean room technology is the key element of modern and safe production processes in all areas, within which particularly high demands are placed on product quality and reliability in accordance with the national and international standards, and regulations GMP/FDA, ISO 146644, DUG MP, WHO etc.

This primarily concerns both the protection of products and processes, as well as protection of involved persons against detrimental effects and contamination. We provide you with individual and innovative solutions in accordance with state of the art technology, for which all relevant norms and regulations are taken into consideration from laminar-flow benches to turnkey clean room systems.

Installation and commissioning

We supervise projects all around the world. Together with our partners, we guarantee top-quality installation and supervisory operations.

Specially trained professionals are provided to perform demanding commissioning tasks and particle measurements within the field of clean room technology.

World-wide after sales service

We provide our customers with a comprehensive service, not only during Turnkey project design and execution, but also later, with continued assistance that enables the installation to be maintained fully operational throughout its useful lifetime.
